- Professional Risk Management

Lunch will
be served in
the dining
room foyer

Goals & Learning Objectives

At the conclusion of the activity the participant should be able to:

Describe the epidemiology of co-occurring disorders and narrate a pragmatic way to conceptualize these patients.

Determine developmentally specific needs of youth with opioid addiction.

Increase their understanding of Maryland's response to the growing epidemic of opioid overdose.

List at least two FDA-approved medications used for the treatment of alcohol use disorders.

Discuss the risk factors for the development of substance use disorders, including genetic, biological, and environmental.

Name at least three FDA-approved medication formulations used for the treatment of nicotine use disorders.

Identify at least one new medication that is currently under development for the treatment of an addictive disorder.

Define proper screening tools and strategies for the most common substance abuse disorders.

In an effort to reduce waste **you will not be receiving paper copies of the today's presentation slides.** Please see the instructions below for information on how to access the day's materials.
