

## **Speaker Information**

**Yngvild Olsen, M.D.** currently serves as Medical Director for the Institutes for Behavior Resources/REACH Health Services, and as a consultant on integrated care initiatives in Baltimore City. Dr. Olsen previously served as the Vice President of Clinical Affairs and Medical Director for the Baltimore Substance Abuse Systems, Inc.

**Enrique Olivares, M.D.** is Director of Addictions at ValueOptions, Inc. Dr. Olivares served as Chief of Psychiatry at the University of Maryland Medical Center from 2008-2015. He is board certified in adult psychiatry and addiction medicine.

**Eric Strain, M.D.** serves as Director of The Center for Substance Abuse Treatment and Research at Johns Hopkins Bayview Medical Center. His areas of expertise include: addiction psychiatry services, substance abuse and substance abuse research.

**Marc Fishman, M.D.** is Medical Director of Maryland Treatment Centers. His clinical specialties include treatment of drug-involved and dual-diagnosis adolescents and opioid dependence in adolescents and adults. His research work has focused on models of care and treatment outcomes in adolescent addictions, in particular opioid dependence.

**Sunil Khushalani, M.D.** serves as Service Chief of the Co-Occurring Disorders Program at Sheppard Pratt Health System. He specializes in working with patients who have both addictions and other major psychiatric disorders. He was recognized in 2014 by the Castle Connolly Top Doctors List.

**George Kolodner, M.D.** is an addiction psychiatrist who specializes in outpatient treatment of substance use disorders. After leaving the Navy in 1973, he designed and implemented the first intensive outpatient addiction treatment program in the country – the Kolmac Clinic – where he continues to serve as the medical director.

**Christopher Welsh, M.D.** is Medical Director of the Substance Abuse Consultation Service and the Comprehensive Recovery Program at University of Maryland Medical Center. His clinical work is mainly in the areas of addiction and dual diagnosis. He has also worked with the Baltimore City Department of Health on the needle-exchange and opioid overdose prevention projects.
